Hi all: I just spoke to John Nickerson. Nobody is supposed to be working on stair 4 on the 3<sup>rd</sup> floor. He thinks this must be a mix-up with a stair 4 request for another floor. He went off to go investigate and straighten this out. Thanks for the heads up. Linda

We all agree that the readers belong on the doors near the elevators and Exit #1, however the workmen were attempting to install the readers on Exit #4 (to which Chuck refers in his email). There just needs to be some follow-up with the workmen, so that they refer to the plan and install the readers on the correct exits.  
Thank you, Julie
